Note:

For PDI-16 and PDI-18 (Gastroenteritis and Urinary Tract Infection, respectively) there is an issue with the Agency for Health Research and Quality (AHRQ) requirements and the Florida Agency for Health Care Administration (AHCA) inpatient discharge data.

The AHRQ analysis requirements, for PDI-16 and PDI-18, state "All non-maternal discharges ages 3 months to 17 years" need to be excluded (i.e. 0-89 days) The AHCA hospital discharge data does not have data for the "Age in Days" for records indicating an Age of Zero (0). Therefore, it is not possible to exclude records of children with age 29-89 days (0-28 days are excluded via neonate exlusion).

	Percent	6.1%	9.6%	9.7%

Note:

The above analysis contains records for all emergency department visits for which the severity of the visit did not result in an inpatient admission.

All records that do not have one of the 5 above mentioned CPT codes (in the CPT code fields) are discarded. The data file contains 10 CPT code fields: Principal CPT Code field (PRINCPT) and 9 other secondary CPT (OTHCPT 1-9) code fields. From these 10 CPT code fields, the CPT code found with the most severe acuity is used to categorize each patient record.
